

# THE COMMUNITY PROJECTS FUND

Through the RIPE NCC Community Projects Fund, we aim to support projects of value to the operation, resilience and sustainability of the Internet, with a focus on tools and services benefitting the technical community in our service region.

There’s no shortage of creative solutions in our community, and this fund gives innovators the chance to work on their project for ‘the Good of the Internet’.

The RIPE NCC Community Projects Fund opened its call for applications in March 2023. The application period was open for just over 12 weeks, and 54 applications from 26 different countries were submitted to the Selection Committee.
