RIS

Our Routing Information Service (RIS) uses a globally distributed set of Remote Route Collectors (RRCs), usually located at Internet Exchange Points, to collect and store Internet routing data.

IN 2023

We focused on adding peers in regions where we didn't have many to improve the results.

We improved the timeliness of MRT dump files by switching them to a new pipeline.

We revamped our beaconing set-up to allow users to build visualisations more easily and better expose insights.
